- Notes:**
- Meat Chemistry and Tallow:** Due to changes in BICON Import Conditions, we are very pleased to now be able to provide Meat & Bonemeal (MBM) and Tallow (TAL) Chemistry samples to our Australian participants (supplied from New Zealand).
  - Meat Microbiology:** *S. aureus* testing is offered in months **2** and **8**.
  - STEC = Shiga toxin-producing *Escherichia coli* (including O157:H7);** if you would like to participate in this program, please contact us as you may require a Permit to Import these samples.
  - Our **WaterChek Chemistry programme** has a separate Timetable – please ask if you would like a copy.
  - Water Microbiology (WMQ):** “Potable P/A” = Presence/Absence for *Total coliforms* and *E. coli* only, utilising rapid test technology.
